(2013-04-03 20:26) myself: I get blackmailed by a guy saying he's in deep shit with hell's angels

(2013-04-03 20:27) myself: he says he was fronted \$700k in LSD from them

(2013-04-03 20:27) myself: he gave it to lucydrop to sell on sr

(2013-04-03 20:27) myself: he said lucy took off with the product

(2013-04-03 20:27) myself: i said, have the hells angels contact me so i can work something out

(2013-04-03 20:27) cimon: ha!

(2013-04-03 20:28) myself: very foolishly he did

(2013-04-03 20:28) myself: they said they caught up with lucy, got the product back and killed him

(2013-04-03 20:28) myself: I didn't hear from the blackmailer agian so i thought the case was closed

(2013-04-03 20:28) cimon: wait-- I'm missing something here

(2013-04-03 20:29) myself: go ahead

(2013-04-03 20:29) cimon: how was he blackmailing?

(2013-04-03 20:29) myself: oh yea

(2013-04-03 20:29) myself: he had thousands of addresses from customers and vendors

(2013-04-03 20:29) myself: he said he installed a keylogger on lucys comp

(2013-04-03 20:29) myself: he was threatening to release all of the user addresses

(2013-04-03 20:29) myself: make sense

(2013-04-03 20:30) myself: ?

(2013-04-03 20:30) cimon: yeppers

(2013-04-03 20:30) cimon: now it does

(2013-04-03 20:30) myself: ok, so this last friday he says I have 72 hours to send him half a mil or he's releasing the info

(2013-04-03 20:30) myself: by this time I've sold the hell's angels on becoming vendors themselves

(2013-04-03 20:31) myself: so I ask them if they are still after the guy

(2013-04-03 20:31) myself: they say no, debt was paid when they caught up to lucydrop, so I pay them to hunt down the blackmailer.

(2013-04-03 20:31) myself: he's gone on the run by this time fyi

(2013-04-03 20:32) myself: they catch up to him within a day and he sings

(2013-04-03 20:32) cimon: well, I bet ya he won't use the HA as a reference again any time soon

(2013-04-03 20:32) myself: says he was in cahoots with lucy all along and ripping the angels off and black mailing me was part of the plan

(2013-04-03 20:33) myself: he also said a 3rd party, our man tony76 orchestrated the whole thing

(2013-04-03 20:33) myself: gave up his id

(2013-04-03 20:33) cimon: ahhh, and that's how you got tony, fucking excellent

(2013-04-03 20:33) myself: he's a brit

(2013-04-03 20:34) cimon: how very convenient, where's he located

(2013-04-03 20:34) cimon: more or less, of course

(2013-04-03 20:34) myself: lemme look it up. I have the town

(2013-04-03 20:34) myself: gotta look up the message on SR

(2013-04-03 20:35) myself: helluva story eh?

(2013-04-03 20:36) cimon: Man, I still can't believe tony fell into yer lap. Wonder if DA is hanging around the edge of that mix.

(2013-04-03 20:36) myself: somehow I doubt it

(2013-04-03 20:37) myself: have you tried connecting on pidgin?

(2013-04-03 20:38) cimon: So how does tony 'train' other folks to rip you off?

(2013-04-03 20:38) cimon: installing it on my other laptop

(2013-04-03 20:38) myself: not sure, prolly just shows them how to use SR in general, how to get good feedback, and then how to maximize the rip off at the end

(2013-04-03 20:41) myself: the guy is from Surrey apparently

(2013-04-03 20:42) cimon: I thought he was cali-based, or am I completely confused

(2013-04-03 20:42) myself: why did you think that?

(2013-04-03 20:43) cimon: I thought that was the conclusion when he did the rip off

(2013-04-03 20:43) myself: I don't remember that

(2013-04-03 20:44) cimon: yeah, I must be mis-remembering that

(2013-04-03 20:44) myself: nipplesuckcanuck sounds canada based

(2013-04-03 20:44) myself: vancouver

(2013-04-03 20:47) cimon: How old is the info on tony, and does he know or suspect you have his info?

(2013-04-03 20:48) myself: it is less than 2 days old, and the only thing he should know is that his two guys aren't getting back to him

(2013-04-03 20:52) cimon: ok, installed pidgin here, adding the xmpp server account...

(2013-04-03 20:56) cimon: Gotta mess about here with proxy tor will likely drop off for a few minutes while I configure it

(2013-04-03 20:56) myself: ok
