Hi, I need a few of your highest quality IDs. I notice several attributes you list:

hologram  
UV  
scannable  
raised lettering

Can you give me a rundown of the importance of these attributes and what they are needed for? For example, which are needed to pass airport security for a domestic flight? Which are needed to get through being pulled over by a cop? Are any of your IDs suitable for this purpose or are they useful when scrutinized superficially?

However you respond, I would like about half a dozen of your best USA IDs and one of the best from each of the international locations (Australia, UK, Canada).

Thank you for your assistance, I'll be checking for a reply daily.

If you are using them for those purposes I would go for the cards with all the features, are you interested in any specific states/provinces? Please narrow it down a bit for me as I offer a lot of different cards, thanks.

You have Illinois, South Carolina, New Jersey, Florida, and Colorado listed as having (Holograms+UV+Scannable), so I'd like one of each of these. Then I'd like the New South Wales ID and the UK ID. For Canada, you have:

1. Quebec Driver's License (Scannable Magstripe1,2,3)
2. Alberta Driver's License (Holo, Raised LTR, Scans)
3. Ontario Driver's License (Raised Lettering, Scans)

I guess Alberta is better than Ontario because it has Holo. Is there a difference between "Scans" and "Scannable Magstripe1,2,3"? If there isn't, then I'd like the Alberta ID as well.

You also have the following listing:

New Texas Drivers License(Raised LTR, Holo, Scans)

This is your only US ID with "Raised LTR", but it doesn't have "UV". Can you comment on it's quality compared to the US IDs listed above?

Can you comment on the suitability of using any of these IDs to board a domestic USA flight?

Can you please comment on what the various attributes mean? For example, does "UV" mean if it is held under a UV light, then some pattern appears that makes it look legit? If it doesn't have "UV" does that mean if it is held under UV light it will be exposed as a fake? In general, how much scrutiny can these cards hold up against?

Sorry for all of the questions, but I hope you can spare a moment to inform me.

Alberta doesn't have a magnetic stripe, it has a 2d barcode on the back that is scannable.

I provide UV on my DL's for +\$50 US if its not included in the listing, the New TX DL is very good and has worked great for my past buyers.

I can't say for sure as no past buyer has told me if it has/has not worked for this purpose.

If you choose UV (which I suggest), the same UV features that are on the real card will be on yours as well.

They can hold up against a hgih amount of scrutiny, if you have any other questions let me know,

Regards.

ok, how much for the following:

California  
New York  
Texas  
Florida  
Colorado  
South Carolina  
UK  
New South Wales  
Alberta

All newest and at the highest quality and most security features you can do.

Seizures rarely happen, maybe twice in 2 years. You will not get in trouble for this if it is seized, in the worst case scenario they may send a letter to you saying they have it and that if you want to come pick it up you can. DO NOT go pick it up, obviously, if this happens, remember that anyone can send anyone anything, I can get them re-done for you but it'll take about a week and I would need to send it to another address, interested?
